How to read and understand this benefit illustration?

This benefit illustration is intended to show what charges are deducted from your premiums and how the unit fund, net of charges and taxes, may grow over the years of the policy term if the fund earns a gross return of 8% p.a. or 4% p.a. These rates, i.e., 8% p.a. and 4% p.a. are assumed only for the purpose of illustrating the flow of benefits if the returns are at this level. It should not be interpreted that the returns under the plan are going to be either 8% p.a. or 4% p.a.

Net Yield mentioned corresponds to the gross investment return of 8% p.a., net of all charges but does not consider mortality, morbidity charges, underwriting extra, if any, guarantee charges and cost of riders, if deducted by cancellation of units. It demonstrates the impact of charges and taxes on the net yield. Please note that the mortality charges per thousand sum assured in general, increases with age.

The actual returns can vary depending on the performance of the chosen fund, charges towards mortality, morbidity, underwriting extra, cost of riders, etc. The investment risk in this policy is borne by the policyholder, hence, for more details on terms and conditions please read sales literature carefully.

Part A of this statement presents a summary view of year-by-year charges deducted under the policy, fund value, surrender value and the death benefit, at two assumed rates of return. Part B of this statement presents a detailed break-up of the charges, and other values.

Note: Some benefits are guaranteed and some benefits are variable with returns based on the future performance of your insurer carrying on life insurance business. If your policy offers guaranteed benefits then these will be clearly marked “guaranteed” in the illustration table on this page. If your policy offers variable benefits then the illustration on this page will show two different rates of assumed future investment returns. These assumed rates of return are not guaranteed and they are not the upper or lower limits of what you might get back, as the value of your policy is dependent on a number of factors including actual future investment performance

Policy Year	Annualized Premium (AP)	Top Up Premium	Premium Allocation Charge (PAC)	Annualized Premium - Premium Allocation Charges	Mortality, Morbidity Charge	GST	Policy Admin. Charge	Guarantee Charge	Other Charges*	Additions to the fund*	Fund before FMC	FMC	Fund at End of the Year	Surrender Value	Death Benefit
26	0	0	0	0	0	0	4,200	0	0	36,154	44,68,369	59,289	44,45,234	44,45,234	44,45,234

*There are no charges included in other charges. Guaranteed Loyalty Additions declared as per the product terms and conditions are included on Additions to the fund.

Notes: 1. Refer the sales literature for explanation of terms used in this illustration.

2. Fund management charge is based on the specific fund option(s) chosen.

3. In case rider charges are collected explicitly through collection of rider premium, and not by way of cancellation of units, then, such charges are not considered in this illustration. In other cases, rider charges are included in other charges

I, (name), have explained the premiums, charges and benefits under the policy fully to the prospect / policyholder.
